

AWS AI/ML

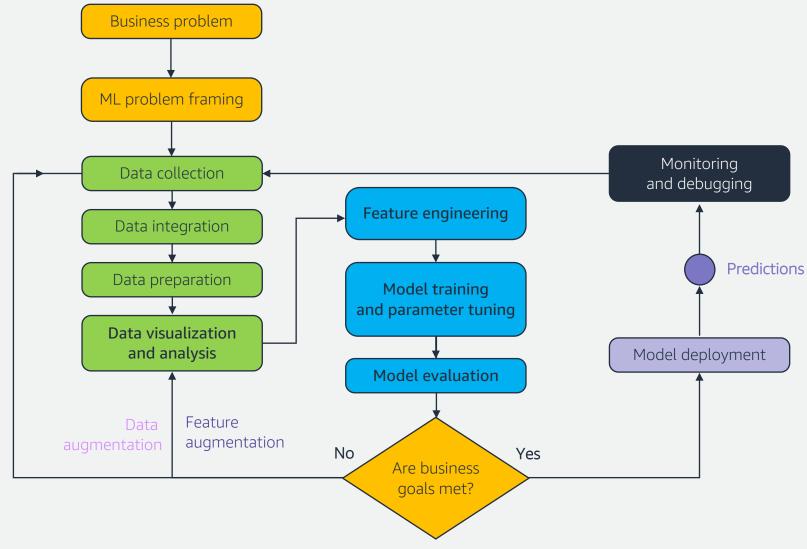

Gabriel Bella Martini Arquiteto de Soluções AWS

Agenda

- 1- Introdução aos serviços de AI da AWS
- 2- Introdução ao SageMaker
- 3- Treinando modelos no SageMaker
- 4- Customizando o SageMaker

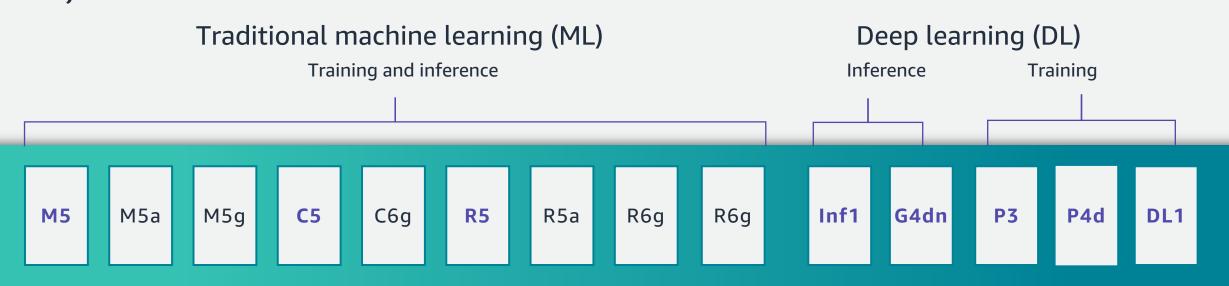

O processo de um projeto de ML

Infraestrutura de computação

Escolha de CPUs, GPUs e aceleradores para suas necessidades de desempenho e orçamento

Habana Gaudi accelerators

EPYC CPU

Graviton CPU Inferentia chip

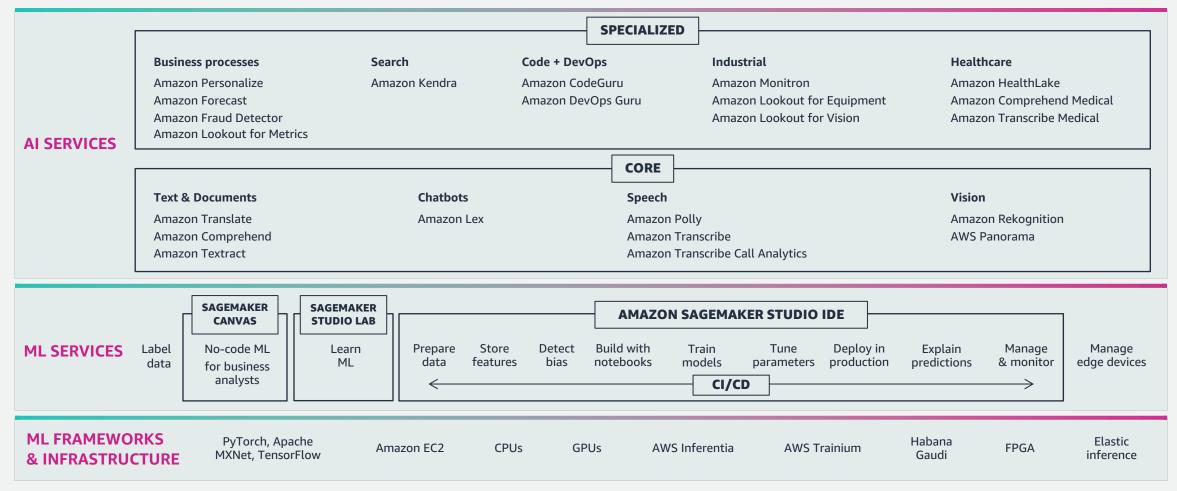

A100, V100, T4 GPUs

Serviços AI/ML na AWS

Conjunto mais amplo e completo de recursos de aprendizado de máquina

Serviços de IA

Labs: https://github.com/gabrielmartinigit/aiml-notebooks

SageMaker

Labs: https://github.com/gabrielmartinigit/aiml-notebooks

Amazon SageMaker

PREPARE

SageMaker Ground Truth

Label training data for machine learning

SageMaker Data Wrangler NEW

Aggregate and prepare data for machine learning

SageMaker Processing

Built-in Python, BYO R/Spark

SageMaker Feature Store NEW

Store, update, retrieve, and share features

SageMaker Clarify NEW

Detect bias and understand model predictions

BUILD

SageMaker Studio Notebooks

Jupyter notebooks with elastic compute and sharing

Built-in and Bring your-own Algorithms

Dozens of optimized algorithms or bring your own

Local Mode

Test and prototype on your local machine

SageMaker Autopilot

Automatically create machine learning models with full visibility

SageMaker JumpStart NEW

Pre-built solutions for common use cases

TRAIN & TUNE

Managed Training

Distributed infrastructure management

SageMaker Experiments

Capture, organize, and compare every step

Automatic Model Tuning

Hyperparameter optimization

Distributed Training NEW

Training for large datasets and models

SageMaker Debugger NEW

Debug and profile training runs

Managed Spot Training

Reduce training cost by 90%

DEPLOY & MANAGE

Managed Deployment

Fully managed, ultra low latency, high throughput

Kubernetes & Kubeflow Integration

Simplify Kubernetes-based machine learning

Multi-Model Endpoints

Reduce cost by hosting multiple models per instance

SageMaker Model Monitor

Maintain accuracy of deployed models

SageMaker Edge Manager NEW

Manage and monitor models on edge devices

SageMaker Pipelines NEW

Workflow orchestration and automation

SageMaker Studio

Integrated development environment (IDE) for ML

Tipos de Treinamento

ML Marketplace

Algoritmos Built-in

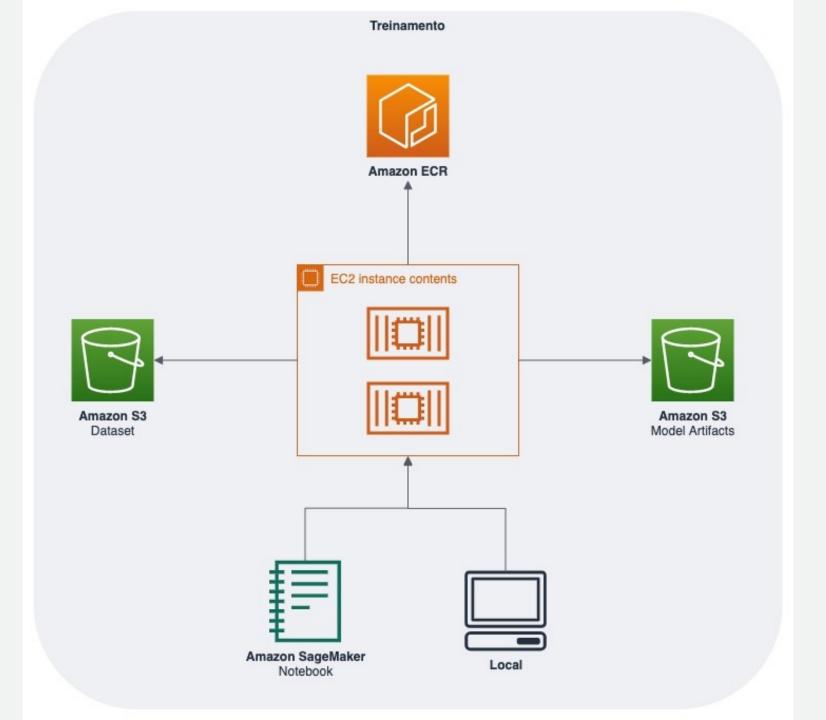

Script Mode

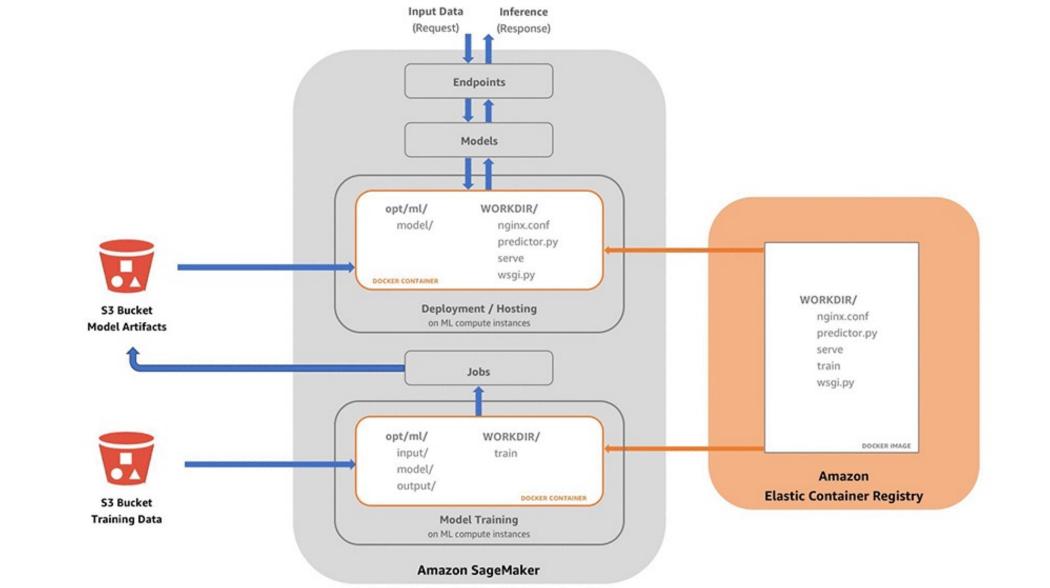

Custom Container

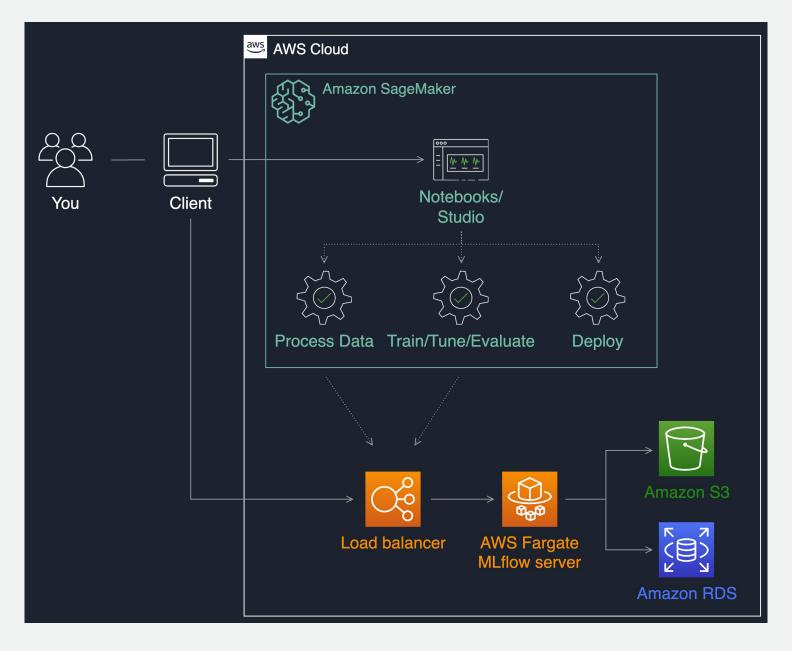

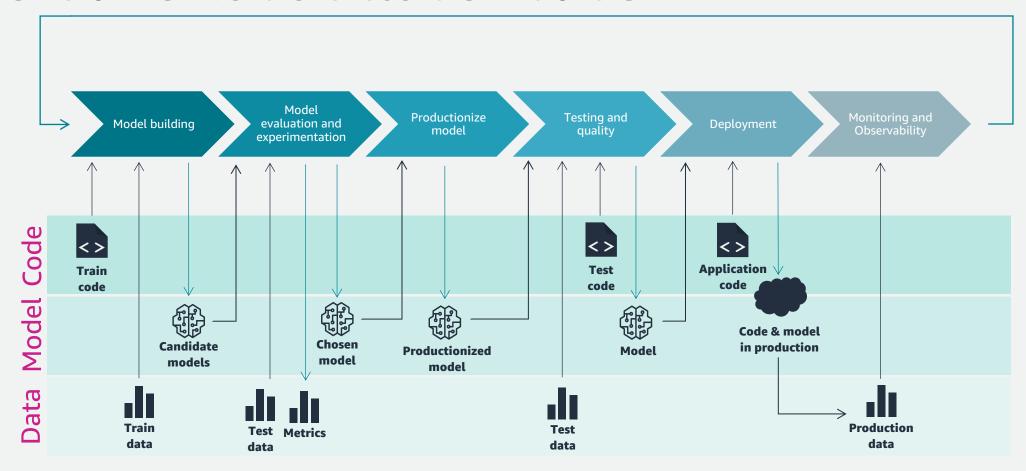

MLOps

AWS MLOPS whitepaper: https://d1.awsstatic.com/whitepapers/mlops-continuous-delivery-machine-learning-on-aws.pdf

ROLE	PRIORITIES	NEEDS
Data Scientist	Makes sense of data, generates and communicates insights to improve or create business processes, creates predictive ML models to support them	Data accessML compute environmentsRobust ML tools
Data Engineer	Builds scalable pipelines, transforms and loads data into structures complete with metadata that can be readily consumed by the Data Scientist	Ad hoc queryingQuick visualization
Security	Risk and Compliance across the enterprise. Prevent data leakages. Audit user activity. Detect model bias.	 Alerts – data leakages, breaches Reports – data, user activities
MLOps / ML Engineer	Monitoring for reliability, quickly diagnose deployment or availability issues	Data drift, Model driftDashboards
SysOps Engineer	Provision the right infrastructure for the right team without incurring idle resources expenses	Capacity planningResource usageGovernance at scale
Business Sponsor	Vetting the priortization and ROI, funding projects, providing ongoing feedback	ReportingResultsDashboards

Gerenciamento do ciclo de vida de ML

Estudar AI/ML na AWS

- Machine Learning University: https://www.youtube.com/channel/UC12LqyqTQYbXatYS9AA7

 Nuw
- AWS Skill Builder: https://explore.skillbuilder.aws/lms/
- SageMaker Studio Lab: https://studiolab.sagemaker.aws/

Obrigado!
